

Dock Adapter for iPod shuffle

Use your iPod shuffle 2nd generation
in full-size dock devices

Quick Start Guide

Thank you for purchasing Griffin's Dock Adapter for iPod shuffle.

The Griffin Dock Adapter gives your iPod shuffle 2nd generation a standard dock connector, just like the full-size iPod. With this adapter, you can use your iPod shuffle with devices that only accept the dock connector.

The Griffin Dock Adapter is shaped to fit devices that accept dock inserts, such as speakers and other devices made for full-size iPod models.
