Press 2X to skip forward 1 track
Press 3X to skip backward 1 track

Record: To use SmartTalk as an external mic, download and install Griffin's iTalk app from the iTunes App Store

More About Recording

Audio recording has been enabled for iPhone 3G, iPhone, iPod touch (2nd generation), iPod nano (4th generation) and iPod classic (120GB). There are slight differences in the way recording is enabled however.

Here's how it all works.

iPod nano (4th generation), iPod classic (120GB)

These models are pre-loaded with Apple's Voice Memo application.

Connect SmartTalk to the headphone jack.

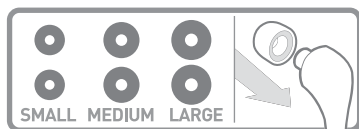

Select Voice Memos from your iPod's menu.

When you begin recording, TuneBuds Mobile will record your voice memos and other audio.

Press control button once to start recording, again to pause or stop.

iPhone 3G, iPhone, iPod touch (2nd generation)

You must load recording software on to your compatible iPhone 3G, iPhone or iPod touch (2nd generation) before you can record. We recommend Griffin Technology's iTalk app, available through the iTunes App Store. SmartTalk may also work with other recording apps available from the iTunes App Store.

This TuneBuds Mobile package includes 3 sizes of interchangeable, washable ear cushions, designed to provide ultra-comfortable fit, and to isolate your music from outside noises. Choose the set of ear cushions that provides the most comfortable, secure fit for your ears.

Call Griffin's Customer Support at 800-208-5996. Monday-Thursday 9 am - 6 pm and Friday 9 am - 5 pm Central time.

Your call will be answered by real human beings who actually know and use Griffin products.
