

# AirClick Quick Start Manual

## What Do I Need?

To use AirClick, you'll need either:

- iPod with dock connector (not included); or...
- iPod mini (not included).

## What Is All This Stuff?

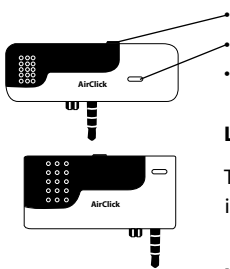

AirClick features two key pieces: the Remote Control and the Receiver Module. Let's take a look:

### Remote Control

- Play/Pause
- Next/Fast Forward
- Previous/Rewind
- Volume Up
- Hold Switch (Orange = Hold)
- Volume Down

### Receiver Module

- Headphone Jack (connect headphones or speakers)
- LED (illuminates when receiving a command)
- Pairing Switch (Back of unit. See PAIRING)

## Let's Install it!

To install the AirClick, simply plug the receiver module into the top of your iPod or iPod mini. That's it!

## How Do I Use it?

Controlling your AirClick is as simple as using your iPod. Here's how:

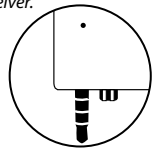

Turn iPod On:	Press any button on the Remote Control to wake the iPod.
Turn iPod Off:	Press and hold the Play/Pause (⏸) Button for two seconds.
Play a Song:	Press the Play/Pause (⏸) Button. Note: If the iPod is at the Main Menu, pressing Play/Pause will cause the iPod to start playing all of its music.
Pause a Song:	Press the Play/Pause (⏸) Button while a song is playing.
Go to Next Song:	Press the Fast Forward (⏭) Button.
Go to Previous Song:	Press the Rewind (⏮) Button.
Fast Forward Song:	Press/Hold the Fast Forward (⏭) Button.
Rewind Song:	Press/Hold the Rewind (⏮) Button.
Increase Volume:	Press the Volume Up (⏮) Button.
Decrease Volume:	Press the Volume Down (⏭) Button.

## Pairing

By default, all AirClicks work on the same "channel." If you have more than one AirClick Remote Control within range of an AirClick Receiver, the Receiver will happily take commands from both Remotes.

Since you probably don't want this to happen (unless you like your neighbor controlling your iPod), you can tell the Receiver to accept commands only from a specific AirClick Remote Control through a process called Pairing. Use Pairing whenever more than one AirClick Remote Control will be used in the same area.

You'll find the pairing button on the back of your receiver.

### To Turn Pairing On:

- Press the Pairing Switch on the Receiver Module by inserting a paper clip or similar device. The LED on the Receiver will light up.
- Press any button on the Remote within five seconds
- The LED on the Receiver will flash rapidly for one second, indicating that the Pairing was successful

### Turn Pairing Off:

To reverse the process, allowing the Receiver Module to once again be controlled by any Remote Control, simply use a straightened paper clip or similar device to press the Pairing Switch on the Receiver Module and DO NOT press any buttons on the Remote Control. After five seconds, the LED on the Receiver will turn off, and it will again respond to any AirClick Remote.

### Photo Browsing:

AirClick can be used to display images on your iPod Photo. To do so, you'll need to put the AirClick Remote Control into Photo Mode:

- Set the Hold Switch on the AirClick Remote (an orange dot will appear).
- Press and hold the Play/Pause button.
- With the Play/Pause button depressed, slide the Hold Switch to Active.

You can now browse forward or backward through photographs by pressing the Volume Up and Volume Down buttons, respectively. (Not enabled for TV out.)

To exit Photo Mode, just slide the Hold Switch from Active to Hold, then back to Active.

## Frequently Asked Questions

*Will I need to replace the battery?* With normal use, the AirClick Remote's battery should last for the life of the product. Should the battery need to be replaced, open the Remote Control unit by removing the three small screws, and replace with a CR2032-type battery or equivalent.

*Can I use this AirClick Remote with an AirClickUSB?* Absolutely. The AirClick Remote can control Receiver Modules for AirClick, AirClick mini, and AirClickUSB.

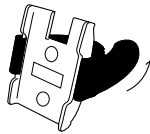

*How Does It Work?* The thing that makes the AirClick unique can be summed up in two little letters: RF. AirClick transmits its commands via Radio Frequency. Most remotes use infrared (IR), requiring the remote to be in "line of sight" of what you want to control. Since the AirClick uses RF, much like a cordless telephone, you don't even have to be in the same ROOM to control an iPod!

*Can I use multiple AirClicks in the same room/house?* Yes, but you'll want to "Pair" the AirClicks to prevent unwanted commands from being sent/received. (See *Pairing*.)

*Why can't I adjust the volume?* A song must be playing on the iPod before the volume can be adjusted using the AirClick Remote Control. If playing through the dock connector, volume cannot be controlled remotely, as the line out volume is constant.

*Use your Remote Cradle and straps for instant attachment.  
Loosen the straps on the Remote Cradle before inserting or removing Remote.*

## Remote Control Technical Specifications

- Transmission: Radio Frequency
- Frequency: 433.92MHz
- Operating Range: Up to 60ft
- Battery: CR2032 3V
- Dimensions: 2.75"x 1.25" x 0.5"  
(0.75" max depth including belt clip)
- Weight (including battery): 0.8 oz

**FCC COMPLIANCE:** This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. **CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**WARRANTY:** Griffin Technology offers a one year limited warranty on all products sold. We warrant our retail hardware products to be free of defects in materials and workmanship that result in failure during normal usage. This warranty extends to the original end-user purchaser from the time of retail purchase. The limited warranty does not cover misuse, unauthorized modifications, and external causes, such as acts of nature. This limited warranty is the sole and exclusive remedy and is in lieu of all other warranties, expressed or implied. Griffin will not be liable for any indirect, incidental, or punitive damages arising from use of this product.
