

PowerJolt® Dual Universal User Guide

Thank you for purchasing Griffin PowerJolt Dual Universal, the best way to charge two USB devices at once.

Plug PowerJolt into your car's cigarette lighter or 12 volt accessory socket, and use it to power and charge a wide variety of USB-powered devices, including USB-chargeable iPod models and other MP3 players. Use the charging cable that came with your player to connect to PowerJolt's standard Type A USB sockets. Please check your USB device's documentation to find out more about its charging requirements.

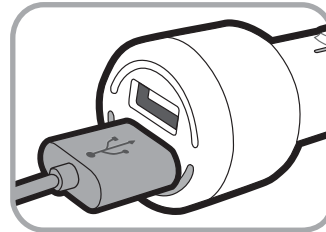

Illuminated Charge Indicator

- ▲ When a device is plugged into either of PowerJolt's USB ports, the adjacent LED will light up GREEN.

Circuit Protection

PowerJolt protects itself and your equipment with a built-in smart fuse circuit breaker. Should the circuit breaker ever kick out to intercept a voltage surge, unplug PowerJolt and wait 15 seconds for it to reset itself.

Technical Specifications

Works with devices that charge using standard Type A USB connector. (Check your device's power requirements.)

- ▲ Input voltage: 12 volts DC
- ▲ Maximum input current: 2 amps
- ▲ Output voltage: 5.2 volts AC at 500mA per USB socket
- ▲ Circuit Protection: SmartFuse self-resetting internal fuse
