

iKaraoke™

Sing along with your favorite
songs on your iPod®

GRIFFIN

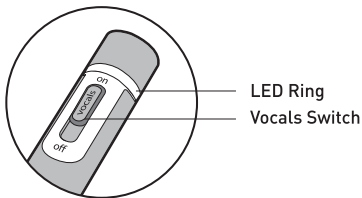

Welcome to iKaraoke!

Thank you for purchasing Griffin iKaraoke. iKaraoke brings the fun and excitement of karaoke into your home, using musical selections straight from your iPod. With iKaraoke, you can sing along with your favorite tunes. iKaraoke isolates the lead vocals and fades them into the background; it blends your vocals into the music, and sends your singing and accompaniment to your stereo via the included audio cable.

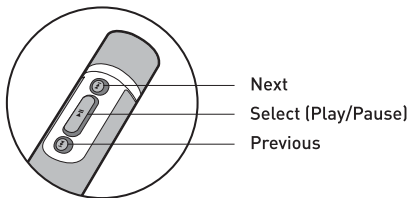

Using iKaraoke could not be simpler.

- 1.** Plug iKaraoke's cord into the dock connector of your iPod and start playing music.
- 2.** Use the included audio cable to connect the headphone port of your iPod to the Line In or Auxiliary In port of your stereo system.
- 3.** Turn the lead vocals On or Off using the oblong slider Vocals switch. In the Off position, iKaraoke's LED Ring lights up and glows red, and the volume of the lead vocals will be drastically reduced, leaving the instrumental accompaniment and backing vocals intact. Enough of the original lead vocal is retained to serve as a guide in your performance. You can use the Vocals switch to help keep your place by temporarily adding the original vocals back in. Note that the effects of the Vocals switch may vary from track to track, depending on how the track was recorded.

iKaraoke outputs a monaural signal containing both the accompaniment and your vocals, and adds a touch of reverb to blend your vocals with the accompaniment and enhance the music with a big room sound.

iKaraoke also features 3 buttons that give you remote control of your iPod playback:

iKaraoke also features 3 buttons that give you remote control of your iPod playback:

- Press the oblong **▶▶** button to Play or Pause the current iPod track.
- Press **▶▶▶** to skip to the next track, or press and hold to scan quickly forward through the current track.
- Press **◀◀◀** to skip to the previous track, or press and hold to scan backward through the currently-playing track.

Automatic Shutoff

iKaraoke features an automatic shutoff function. After 50 seconds of inactivity, iKaraoke will turn itself off. To turn iKaraoke back on, begin playing music on your iPod.

A Note About Audio Feedback

When using any microphone, try to avoid feedback squeal that occurs when sound from the speakers gets picked up by the microphone and reamplified in an unending loop. Feedback loops are always bad for your sound equipment.

To prevent feedback, avoid pointing the iKaraoke microphone at your speakers. For best results, we recommend holding iKaraoke close to your mouth and standing several feet away from the speakers.

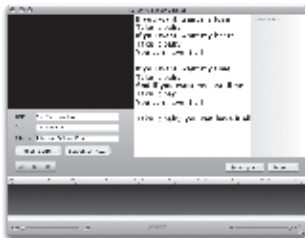

Using TunePromter

TunePromter is freeware for Mac and PC that helps you make your own karaoke videos with lyrics, using the music from your computer. Using music and lyrics that you provide, TunePromter creates video files displaying the song lyrics at the proper pace for singing along.

Download the latest version of the TunePromter installer from the Griffin Technology website:

<http://www.griffintechnology.com/products/tunepromter/>

1. Follow the onscreen instructions to install TunePromter on your computer.
2. Launch TunePromter.
3. Load your favorite song
4. Type or copy and paste in your lyrics
5. Tap your spacebar along with the music to teach TunePromter to display the lyrics in synch with the music.

That's it. TunePrompter gives you a karaoke video with lyrics and music that you can load onto any iPod that supports video. Now you're really ready to sing along!

TunePrompter works with Mac OS X 10.4 and later, and with Windows XP and Vista.
