TuneBuds™ *fit*

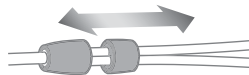

TuneBuds^{fit} User Guide

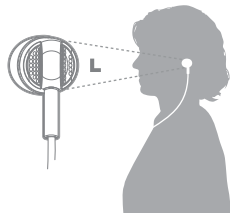

Select any combination of Small, Medium or Large ear cushions for maximum comfort. Believe it or not, many people's right and left ear canals differ in diameter.

Adjust aluminum slider for a snug, comfortable fit and tangle-free storage.

For best results, TuneBuds Fit are designed to be worn with the curved section facing forward. Hold them so that the **R** and **L** are facing you when you put them on. This ensures the earpiece is fully and securely inserted in your ear canal.

! As with any foreign object, take care not to insert TuneBuds Fit any farther into your ear than necessary.

Tech Specs:

Frequency Response:

- 18 Hz – 20 kHz

Driver:

- 10 mm tuned drivers

Impedance:

- 16.0 ohm
