

### Quick Start Guide

Thank you for purchasing Griffin TuneCenter. Your iPod is only minutes away from bringing your music, slideshows, iTunes videos, and even Internet Radio to your home entertainment system. Setup is easy:

### Setting up TuneCenter:

1. Place TuneCenter within 6 feet of your television on a flat surface facing your favorite couch, chair, etc.
2. Attach the yellow, red, and white RCA connectors on the included MediaConnect cable to the appropriate ports on your TV/Stereo, and set the TV to the correct input. [Refer to your TV/Stereo's manual if you need help with this step.] Attach the other end of the MediaConnect cable to TuneCenter's A/V Out port. **Note: If your TV or home theater supports S-Video, you may use a standard S-Video cable to connect, instead, to TuneCenter's S-Video port.**
3. If you are setting up Tune Center for Internet Radio, attach an Ethernet cable from your router to TuneCenter's Ethernet Port.
4. Set the NTSC/PAL switch to the appropriate video format (NTSC for US and Japan, PAL for most of Europe).
5. Attach the included AC Adapter to TuneCenter's 12V DC port, and plug the other end into a wall outlet.

You should now see the TuneCenter Main Menu interface on your TV screen. (If you don't, check your AV connections and your TV's input settings.)

1

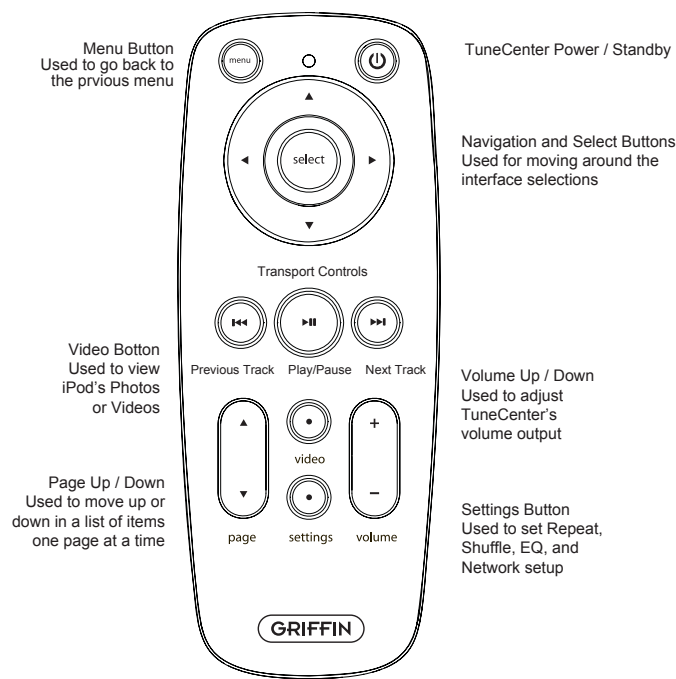

### The TuneCenter Interface

TuneCenter's Main screen lets you choose between iPod Playback and Internet Radio.

Using the navigation buttons on the TuneCenter remote, highlight the selection you would like to listen to, and press the center "Select" button to proceed.

### The TuneCenter Remote Control

2

### Setting up a network connection for Internet radio:

1. Press the Settings button on the TuneCenter Remote, and navigate to the Network Setup Assistant in the Settings screen (shown at right).
2. Select the method by which TuneCenter is to get its IP address. "DHCP" is the correct choice for most users.
3. Set your proxy server settings, if any. It should be set for "No Proxy" for most users.
4. Click "Apply Settings." TuneCenter will restart with its new settings, and Internet radio will be ready to use.

3

### Using TuneCenter to browse the contents of your iPod:

1. Slip your iPod onto TuneCenter's dock connector. TuneCenter includes three universal dock inserts, specifically designed for iPod mini and 4G Photo and Color iPods. All new iPods come with a universal dock insert in their packaging. Additional dock inserts can be purchased directly from Apple.
2. Highlight "iPod Playback" on TuneCenter's Main Menu, and press the Select button on the Remote.
3. Using the navigation buttons on the TuneCenter Remote, you can browse through your menus and playlists using the same familiar categories as your iPod (Artists, Albums, Playlists, etc.). The right navigation button on the Remote will select the highlighted item, and the left button will take you back one menu level.
4. During playback, use the transport buttons on the Remote for Play/Pause, Next/Previous Track, and Scrub Forward/Back. These functions are available anywhere in the menu system.
5. As with the iPod, TuneCenter allows you to browse for another track or playlist while a track is playing. Press the Menu button at the Main Menu screen to return to the Now Playing screen.

### Using TuneCenter to listen to Internet radio:

1. Highlight "Internet Radio" on TuneCenter's Main Menu, and press the "Select" button on the remote.
2. TuneCenter will update station listings using the SHOUTcast Internet radio service, and will display a list of all available stations.
3. Use the Up/Down navigation arrows on the remote to navigate through the stations. [Page Up/Down keys can be used to move quickly through the listings.]

### Using TuneCenter to view photos:

1. Press the Video button on TuneCenter's remote. Your TV screen should go blank.
2. Using the iPod's screen, select Photos. [Note: The TuneCenter remote allows you to navigate the screen on the iPod as well as the TV.] Make sure TV Out is turned on in your iPod Slideshow Settings menu on the iPod.
3. Use the Select button to start the photo slideshow. Use the Up/Down arrows on the TuneCenter remote to navigate through the slideshow, just as you would use the Click Wheel on your iPod.

### Using TuneCenter to view videos:

1. Press the Video button on TuneCenter's remote. Your TV screen should go blank.
2. Using the iPod's screen, select Videos. [You can use the TuneCenter remote to navigate the iPod's screen as well as the TV's.] Make sure TV Out is turned on in your iPod Slideshow Settings menu on the iPod.
3. Use the Up/Down arrows on the TuneCenter remote to navigate through the video selections, just as you would use the Click Wheel on your iPod. Use the Select button to start video playback.

There is no limit to the entertainment possibilities for your TuneCenter. Enjoy!
